TRANSACTIONS OF THE AMERICAN MATHEMATICAL SOCIETY INDEX, VOLUMES 151–160

This Index includes Memoirs published during the period SEPTEMBER 1970–OCTOBER 1971

	Vol.	Pages
DE ACOSTA, ALEJANDRO D. Existence and convergence of probability measures in Banach spaces	152_1	273–298
——— On the concentration and extension of cylinder measures	160	217–228
AGARWAL, A. K. On the geometric means of entire functions of several complex variables	151_2	651–657
AGOSTON, MAX K. Groups of embedded manifolds	154	365–375
AHARONOV, D. and WALSH, J. L. Some examples in degree of approximation by rational functions	159	427–444
AIGNER, MARTIN and DOWLING, THOMAS A. Matching theory for combinatorial geometries	158_1	231–245
AKCOGLU, M. A. and BRUNEL, A. Contractions on L_1-spaces	155_2	315–325
AKUTOWICZ, EDWIN J. On mean-periodicity. II	157	449–457
ALPERIN, J. L., BRAUER, RICHARD and GORENSTEIN, DANIEL. Finite groups with quasi-dihedral and wreathed Sylow 2-subgroups	151_1	1–261
ANDERSON, LARRY R. and LAZER, A. C. On the solutions of a class of linear selfadjoint differential equations	152_2	519–530
ANDREA, S. A. The plane is not compactly generated by a free mapping	151_2	481–498
ANDREWS, J. J. and SUMNERS, D. W. On higher-dimensional fibered knots	153	415–426
AOKI NOBUO. On generalized commuting order of automorphisms with quasi-discrete spectrum	152_1	79–97
ARKOWITZ, MARTIN. Whitehead products as images of Pontrjagin products	158_2	453–463
ARMACOST, D. L. Sufficiency classes of LCA groups	158_2	331–338
ARMENTROUT, STEVE. Cellular decompositions of 3-manifolds that yield 3-manifolds	Memoir No. 107	
ATHREYA, KRISHNA B. and NEY, PETER. The local limit theorem and some related aspects of super-critical branching processes	152_1	233–251
BAERNSTEIN, ALBERT II. Representation of holomorphic functions by boundary integrals	160	27–37

	Vol.	Pages
BALABAN, TADEUZ. On the mixed problem for a hyperbolic equation	Memoir No. 112	
BALLOU, DONALD P. Solutions to nonlinear hyperbolic Cauchy problems without convexity conditions	152_2	441–460
BANK, STEVEN. A representation theorem for large and small analytic solutions of algebraic differential equations in sectors	159	293–305
BASMAJI, B. G. Representations of metabelian groups realizable in the real field	156	109–118
BATEMAN, J. M. On the solvability of unit groups of group algebras	157	73–86
BAUMSLAG, GILBERT. Positive one-relator groups	156	165–183
BEACHY, JOHN A. Generating and cogenerating structures	158_1	75–92
BELLAMY, DAVID P. Continua for which the set function T is continuous	151_2	581–587
——— An uncountable collection of chainable continua	160	297–304
BENTSEN, IRVING. The existence of solutions of abstract partial difference polynomials	158_2	373–397
BERBERIAN, S. K. Conditions on an operator implying Re $\sigma(T)$ $=\sigma(\text{Re } T)$	154	267–272
BERENSTEIN, C. A. and DOSTAL, M. A. Topological properties of analytically uniform spaces	154	493–513
BERG, I. DAVID. An extension of the Weyl-von Neumann theorem to normal operators	160	365–371
BERGMAN, GEORGE M. The logarithmic limit-set of an algebraic variety	157	459–469
BERKOVITZ, LEONARD D. and POLLARD, HARRY. Addenda to "A variational problem related to an optimal filter problem with self-correlated noise"	157	499–504
BERMAN, ELIZABETH. Tensor products of polynomial identity algebras	156	259–271
BERMAN, SIMEON M. Maxima and high level excursions of stationary Gaussian processes	160	65–85
BERNDT, BRUCE C. Identities involving the coefficients of a class of Dirichlet series. V	160	139–156
——— Identities involving the coefficients of a class of Dirichlet series. VI	160	157–167
BHARUCHA-REID, A. T., SCHREIBER, B. M. and SUN, T.-C. Algebraic models for probability measures associated with stochastic processes	158_1	93–105

	Vol.	Pages
BHATTACHARYYA, P. On the domain of normality of an attractive fixpoint	153	89–98
BILLERA, LOUIS J. Topologies for 2^X; set-valued functions and their graphs	155_1	137–147
BING, R. H. and MARTIN, J. M. Cubes with knotted holes	155_1	217–231
BLAU, HARVEY I. Under the degree of some finite linear groups	155_1	95–113
BOSSARD, DAVID C. Limit theorems for measures on non-metrizable locally compact abelian groups	159	185–205
BOURGIN, RICHARD D. Barycenters of measures on certain non-compact convex sets	154	323–340
BOUSFIELD, A. K. and CURTIS, E. B. A spectral sequence for the homotopy of nice spaces	151_2	457–479
BOWEN, RUFUS. Entropy for group endomorphisms and homogeneous spaces	153	401–414
——— Periodic points and measures for Axiom A diffeomorphisms	154	377–397
BOYCE, WILLIAM M. Γ-compact maps on an interval and fixed points	160	87–102
BRACE, J. W. and RICHETTA, P. J. The approximation of linear operators	157	1–21
BRAGG, LOUIS R. Errata to "Hypergeometric operator series and related partial differential equations"	159	511
BRAUER, RICHARD, ALPERIN, J. L. and GORENSTEIN, DANIEL. Finite groups with quasi-dihedral and wreathed Sylow 2-subgroups	151_1	1–261
BRECHNER, BEVERLY L. Strongly locally setwise homogeneous continua and their homeomorphism groups	154	279–288
BRICKMAN, L., MACGREGOR, T. H. and WILKEN, D. R. Convex hulls of some classical families of univalent functions	156	91–107
BROWN, D. R. and FRIEDBERG, MICHAEL. Linear representations of certain compact semigroups	160	453–465
BRUALDI, R. A. Common partial transversals and integral matrices	155_2	475–492
BRUNEL, A. and AKCOGLU, M. A. Contractions on L_1-spaces	155_2	315–325
BRYANT, J. L. On embeddings with locally nice cross-sections	155_2	327–332
BRYLAWSKI, THOMAS. A combinatorial model for series-parallel networks	154	1–22
BURES, DONALD. Abelian subalgebras of von Neumann algebras	Memoir No. 110	
BURKHOLDER, D. L., GUNDY, R. F. and SILVERSTEIN, M. L. A maximal function characterization of the class H^p	157	137–153

	Vol.	Pages
BUSBY, ROBERT C. Extensions in certain topological algebraic categories	159	41–56
BUSH, GEORGE C. The embeddability of a semigroup—Conditions common to Mal'cev and Lambek	157	437–448
BYRD, RICHARD D., CONRAD, PAUL and LLOYD, JUSTIN T. Characteristic subgroups of lattice-ordered groups	158_2	339–371
CALDER, J. R. and HILL, J. B. A collection of sequence spaces	152_1	107–118
CAMERON, DOUGLAS E. Maximal and minimal topologies	160	229–248
CANFELL, M. J. Some characterizations of n-dimensional F-spaces	159	329–334
CARRUTH, J. H. and LAWSON, JIMMIE D. Semigroups through semilattices	152_2	597–608
CHAO, CHONG-YUN. On the classification of symmetric graphs with a prime number of vertices	158_1	247–256
CHAPMAN, T. A. Dense sigma-compact subsets of infinite-dimensional manifolds	154	399–426
CHEE, P. S. On the generalized Blaschke condition	152_1	227–231
CHEN, KUO-TSAI. Algebras of iterated path integrals and fundamental groups	156	359–379
CHOU, CHING. On topologically invariant means on a locally compact group	151_2	443–456
CHURCH, P. T. Differentiable monotone maps on manifolds. II	158_2	493–501
COLBY, R. R. and RUTTER, E. A., JR. Generalizations of QF-3 algebras	153	371–386
CONLEY, C. and EASTON, R. Isolated invariant sets and isolating blocks	158_1	35–61
CONNOLLY, FRANCIS X. From immersions to embeddings of smooth manifolds	152_1	253–271
CONRAD, PAUL, BYRD, RICHARD D. and LLOYD, JUSTIN T. Characteristic subgroups of lattice-ordered groups	158_2	339–371
CONWAY, EDWARD D. Stochastic equations with discontinuous drift	157	235–245
COONCE, H. B. A variational method for functions of bounded boundary rotation	157	39–51
COPELAND, ARTHUR H., JR. and PATTY, C. W. Homology of deleted products of one-dimensional spaces	151_2	499–510
CORSON, H. H. Metrizability of compact convex sets	151_2	589–596
CRANDALL, MICHAEL G. and LIGGETT, THOMAS M. A theorem and a counterexample in the theory of semigroups of nonlinear transformations	160	263–278

	Vol.	Pages
CURRAN, PETER. Cohomology of F-groups	152_2	609–621
CURTIS, E. B. and BOUSFIELD, A. K. A spectral sequence for the homotopy of nice spaces	151_2	457–479
CUTLER, DOYLE O. On the structure of primary abelian groups of countable Ulm type	152_2	503–518
CZERNIAKIEWICZ, ANASTASIA J. Automorphisms of a free associative algebra of rank 2. I	160	393–401
DAIGNEAULT, AUBERT. Operations in polyadic algebras	158_1	219–229
DAVIES, E. B. Involutory automorphisms of operator algebras	158_1	115–142
DETEMPLE, D. W. Grunsky-Nehari inequalities for a subclass of bounded univalent functions	159	317–328
DEVINATZ, ALLEN. An asymptotic theorem for systems of linear differential equations	160	353–363
DIETRICH, WILLIAM E., JR. On the ideal structure of $C(X)$	152_1	61–77
DOSS, RAOUF. Approximations and representations for Fourier transforms	153	211–221
DOSTAL, M. A. and BERENSTEIN, C. A. Topological properties of analytically uniform spaces	154	493–513
DOUGLAS, R. G. and HOWE, ROGER. On the C^*-algebra of Toeplitz operators on the quarter-plane	158_1	203–217
DOWLING, THOMAS A. and AIGNER, MARTIN. Matching theory for combinatorial geometries	158_1	231–245
DOWNING, J. SCOTT. Decomposing manifolds into homologically equivalent submanifolds	152_2	495–501
DRACHMAN, BYRON. A generalization of the Steenrod classification theorem to H-spaces	153	53–88
DUBOIS, PAUL F. Generally p^α-torsion complete abelian groups	159	245–255
DUNKL, CHARLES F. and RAMIREZ, DONALD E. Homomorphisms on groups and induced maps on certain algebras of measures	160	475–485
EASTON, R. and CONLEY, C. Isolated invariant sets and isolating blocks	158_1	35–61
EDELSON, ALLAN L. Real vector bundles and spaces with free involutions	157	179–188
EDWARDS, J. R. and WAYMENT, S. G. Representations for transformations continuous in the BV norm	154	251–265
——— Integral representations for continuous linear operators in the setting of convex topological vector spaces	157	329–345
ELLIOTT, E. O. and MORSE, A. P. Errata to "General product measures"	157	505–506
ERICKSON, K. BRUCE. Strong renewal theorems with infinite mean	151_1	263–291

	Vol.	Pages
ERICKSON, T. S. and MONTGOMERY, S. The prime radical in special Jordan rings	156	155–164
ERNEST, JOHN. A strong duality theorem for separable locally compact groups	156	287–307
EVANS, E. GRAHAM, JR. Zero divisors in Noetherian-like rings	155_2	505–512
FAKHRUDDIN, SYED M. Modules over Prüfer domains	159	469–487
FALCONER, ETTA. Isotopy invariants in quasigroups	151_2	511–526
FARLEY, REUBEN W. Positive Clifford semigroups on the plane	151_2	353–369
FAULKNER, JOHN R. Orbits of the automorphism group of the exceptional Jordan algebra	151_2	433–441
——— A construction of Lie algebras from a class of ternary algebras	155_2	397–408
——— Octonion planes defined by quadratic Jordan algebras	Memoir	No. 104
FITZPATRICK, P. M. and PETRYSHYN, W. V. New existence theorems for nonlinear equations of Hammerstein type	160	39–63
FLOYD, E. E. Stiefel-Whitney numbers of quaternionic and related manifolds	155_1	77–94
FRANKLIN, S. P. and RAJAGOPALAN, M. Some examples in topology	155_2	305–314
FRANKS, JOHN. Necessary conditions for stability of diffeomorphisms	158_2	301–308
FRIEDBERG, MICHAEL and BROWN, D. R. Linear representations of certain compact semigroups	160	453–465
FUKUSHIMA, MASATOSHI. Regular representations of Dirichlet spaces	155_2	455–473
FULP, RONALD O. and GRIFFITH, PHILLIP A. Extensions of locally compact abelian groups. I	154	341–356
——— Extensions of locally compact abelian groups. II	154	357–363
FULP, R. O. and STEPP, J. W. Structure of the semigroup of semigroup extensions	158_1	63–73
GELBART, STEPHEN S. Fourier analysis on matrix space	Memoir	No. 108
GILMER, ROBERT and MOTT, JOE. Integrally closed subrings of an integral domain	154	239–250
GLASER, LESLIE C. Euclidean $(q+r)$-space modulo an r-plane of collapsible p-complexes	157	261–278
GLICKFELD, BARNETT W. Meromorphic functions of elements of a commutative Banach algebra	151_1	293–307
GLICKSBERG, I. When is $\mu * L_1$ closed?	160	419–425
GOLDMAN, MARTIN E. An algebraic classification of noncompact 2-manifolds	156	241–258

	Vol.	Pages
